1. Find the first five terms of the power series representing each function, and find the radius of convergence

$$a) f(x) = \frac{1}{1+3x}$$

b) 
$$g(x) = \frac{x}{(1-x)(1-2x)}$$
 (hint: use partial fractions)

2. Find the radius of convergence of the following power series:

$$\sum_{n=1}^{\infty} \frac{n! x^n}{n^n}$$

Answer:

3. True or False?

Suppose that the interval of convergence of  $\sum_{n=1}^{\infty} c_n x^n$  is [-4,2).

a)  $\sum_{n=1}^{\infty} c_n$  converges

Answer: \_\_\_\_\_

b)  $\sum_{n=1}^{\infty} (-c_n 3^n)$  converges

Answer: \_\_\_\_\_
